

A Refocus for 2015

Focus for Youth is a newly created program for youth. It will provide a range of activities to help enrich the lives of our youth within the community. We believe each child is special and deserves love, patience and a chance to shine. Our focus is to help provide support to parents by instilling values that build character.

Focus for Youth will provide programs and activities for ages 6 through 18. Each tailored to fit three distinct age groups; elementary, middle, and high school. Each program will offer encouragement, guidance and mentorship to help our youth face and overcome their challenges. Our efforts will focus on areas such as education, career development, community service and personal stewardship.

Beginning in January we will kick off a series of monthly events. Each event will focus on various issues confronting our youth today. There will also be community service projects for the youth to participate in.
